## Work Experience

**Software Engineer** Mar 2024 — Oct 2026
Health Samurai *San Pedro, Los Angeles, US*

- Developed Aidbox Forms, a medical form building application based on the FHIR SDC standard
- Built a pipeline digitizing paper medical forms into FHIR questionnaires via OCR and LLM extraction
- Created the FHIRPath Editor: parsing, static type analysis, and visual expression authoring
- Engineered the AI Assistant for FHIR SDC and Analytics, winner at the 2025 HL7 AI Challenge
- Shipped Voice Agent: captures answers from conversations, looks up clinical codes, and keeps source evidence alongside generated answers

**Chief Technology Officer** Feb 2021 — Dec 2023
ZeroOne Inc *Tokyo, Japan*

- Developed ZeroOne (former Jidoca), a low-code platform for building web applications
- Built a Kubernetes-native backend that auto-provisions resources for low-code applications, driven by Helm charts
- Implemented multi-tenancy for an open-source fork of the n8n workflow automation software

**Software Engineer** Apr 2020 — Feb 2021
Health Samurai *San Pedro, Los Angeles, US*

- Developed Billogica, a medical billing platform, using Clojure and ClojureScript with a Re-frame/Reagent frontend
- Built the product's design system and reusable component library, including grid-based forms for complex insurance claim details

**Lead Software Engineer** Apr 2018 — Mar 2020
Kash App *Tashkent, Uzbekistan*

- Created eJarima, a national traffic violation monitoring and reporting platform for the government with UNDP funding, crowdsourcing violation reports from citizens. Built the large-scale distributed video transcoding and CDN delivery behind it, plus comprehensive audit logging and privacy controls, in Clojure
- Led development of Pay Kash, a multi-tenant international money remittance service, a business-critical high-throughput GraphQL API coordinating multiple parties across dozens of third-party integrations
- Delivered Tanga, a Stellar-based money exchange service with a mobile app in React Native, integrating payment and blockchain APIs

**Lead Software Engineer** Jun 2017 — Apr 2018
NowMedia Technologies *Tashkent, Uzbekistan*

- Developed the backend of Lamuz, a music streaming service, and its billing system using the PHP stack
- Implemented a high-performance music search engine on Elasticsearch
- Built a personalized music recommendation system on Prediction.io, applying collaborative filtering to user listening histories stored in MongoDB

**Lead Software Engineer** Feb 2014 — Jun 2017
Creative People *Tashkent, Uzbekistan*

- Developed OX POS, a multi-tenant platform automating retail chain operations, from inventory management to in-store workflows
- Designed the REST API on PHP Symfony 2/3, running on Postgres with Elasticsearch for search and analytics
- Built the React/Redux SPA frontend as an early adopter of React
- Created an asynchronous PHP WebSocket server (Ratchet) over RabbitMQ for real-time collaborative stocktaking, and open-sourced the team's Symfony SQL bundle

**Freelance Developer** May 2008 — Feb 2014
Freelance *Samarkand, Uzbekistan*

- Delivered database-driven web applications on PHP/MySQL and Windows desktop software in Delphi, including low-level reverse engineering and WinAPI work

## Projects

**Author**, macrocss github.com/healthsamurai/macrocss

- css-in-js library for clojurescript, heavily inspired by tailwind css

**Author**, formbox-renderer github.com/HealthSamurai/formbox-renderer

- fhir sdc-conformant headless questionnaire engine; extensible ui rendering

**Author**, icdp github.com/olimsaidov/icdp

- implements the chrome devtools protocol in the browser, driving iframe documents as debug targets

## Speaking

- Low-code FHIRPath tools for clinical form designers — FHIR SDC Conference 2025, health-samurai.io/events/sdc-conference-2025
- AI-assisted FHIR questionnaire and ViewDefinition authoring — SQL on FHIR Conference 2025, health-samurai.io/events/fhir-analytics-2025
- Voice-driven FHIR questionnaire scribe with Pydantic AI and Jev — Agents on FHIR, Oct 2026, health-samurai.io/events/agents-on-fhir/2026-10-01-meeting

## Education

**Tashkent University of Information Technologies** Jan 2024 — Present
*PhD Candidate in Computer Science* *Tashkent, Uzbekistan*

**Tashkent University of Information Technologies** Sep 2011 — Jul 2013
*Master's in Information Systems* *Tashkent, Uzbekistan*

**Tashkent University of Information Technologies** Sep 2006 — Jul 2010
*Bachelor's in Information Technologies* *Samarkand, Uzbekistan*

## Skills

- **Programming Languages**: Clojure, ClojureScript, TypeScript, JavaScript, PHP, Python
- **Frameworks**: React, React Native, Re-frame, Reagent, Symfony, Yii, Laravel, Next.js, Nest.js, Svelte, SvelteKit
- **AI & LLMs**: agents, harnesses, MCP, OCR, speech pipelines
- **Healthcare**: FHIR (SDC, R4/R5), OMOP CDM, openEHR
- **Technologies**: PostgreSQL, Elasticsearch, Redis, RabbitMQ, MongoDB, GraphQL, Docker, Kubernetes, Helm, Stellar
- **Languages**: Uzbek (native), Russian (fluent), English (C1)
